Project Title: AttnGAN: Fine-Grained Text-to-Image Generation using Attentional Generative Adversarial Networks (<https://arxiv.org/pdf/1711.10485>)

Group Members:

- Mohsin Siddiqui (24K-7608)
- Muhammad Azhar (24K-7606)

Figure 2. The architecture of the proposed AttnGAN. Each attention model automatically retrieves the conditions (*i.e.*, the most relevant word vectors) for generating different sub-regions of the image; the DAMSM provides the fine-grained image-text matching loss for the generative network.
